

**These Are some insight found in the dataset.**

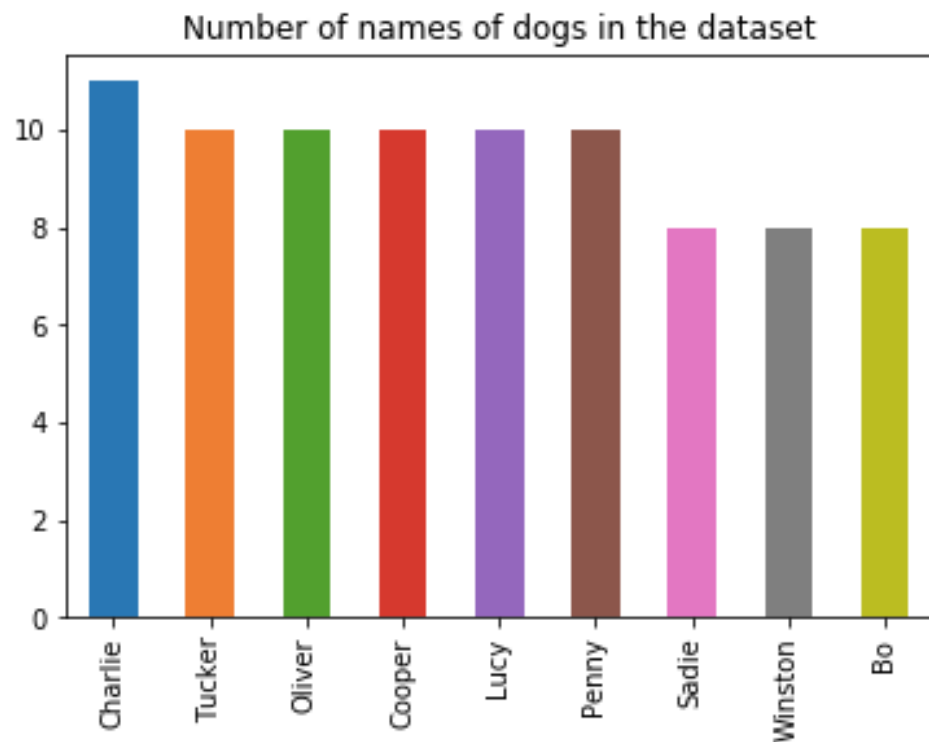

**Here I will share some insight from this dataset I have collected three of them.**

**most of tweets don't have a stage for the dogs followed by stage doggo which they contain the most in the dataset which means bigger dogs usually showed more. Followed by puppo.**

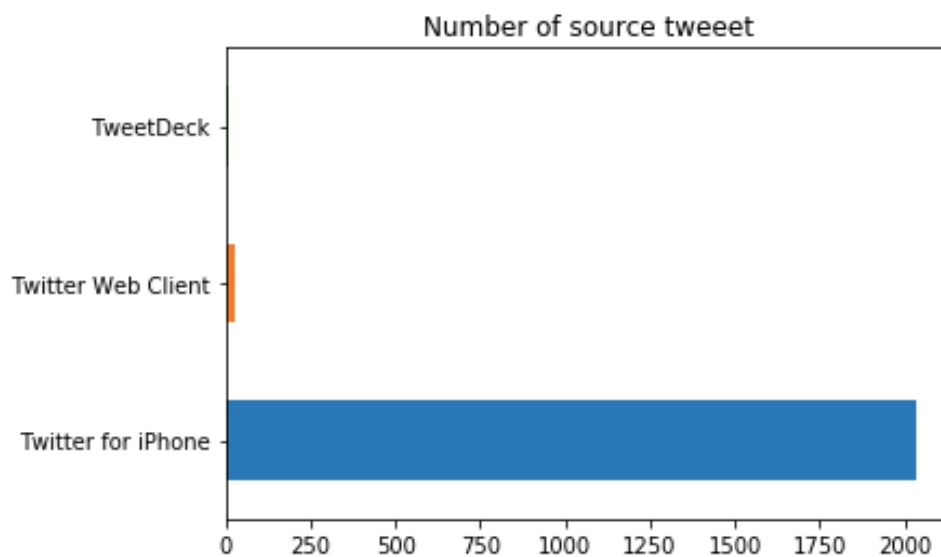

**What we can see that from older to younger trend.**

---

Here I have collected the most name dogs have. I have discovered that Charlie name is popular and has the most name. followed by oliver and lucy and penny etc.

---

Here I have calculated how many tweets come from source, we can see that this account is iphone user and most his tweets come from it. Followed by twitter website. Only handful comes from tweetdeck.
